

Adverse media search results

Subject: Howard Williams | Player 88213 | Case #AML-1042

Search run: 11 Aug 2026, 11:42 UTC Analyst: A. Kowalski

SCOPE

Global adverse media, sanctions and PEP screening across 42 sources, including national press archives, regulatory notices and court listings for England and Wales. Lookback period: 10 years.

SUMMARY OF FINDINGS

Two potential matches were returned. Both were reviewed manually and excluded as false positives on the basis of date of birth and geography. No sanctions or PEP matches were returned.

Result: NO ADVERSE MEDIA CONFIRMED

Continued on page 2.

Match 1 of 2 - reviewed and excluded

Source: regional press archive, 14 March 2019

Headline: 'Howard Williams sentenced over unpaid duty'

REVIEW

Name matches the subject exactly. All other identifiers diverge:

Reported age at publication	52
Subject age at publication	31
Reported location	Newcastle upon Tyne
Subject location of record	Bristol

The article names an individual trading as a sole proprietor in the haulage sector. The subject has no recorded company directorships and no address history in the North East.

Disposition: FALSE POSITIVE - name coincidence only.

Match 2 of 2 - reviewed and excluded

Source: national press archive, 2 September 2022

Headline: 'Gambling operator fined; customer named in evidence'

REVIEW

The named customer is 'H. Williams'. The article does not publish a full name, a date of birth or a location. The operator named is not one at which the subject holds an account, and the evidence bundle referenced predates the subject's registration by four years.

No corroborating identifier was found in any secondary source.

Disposition: FALSE POSITIVE - insufficient identifiers to link.

Sources searched and attestation

SOURCE CATEGORIES

National and regional press archives	18 sources
Regulatory and enforcement notices	9 sources
Court and insolvency listings	7 sources
Sanctions and watchlists	5 sources
PEP and state-owned enterprise registers	3 sources

Total 42 sources

ATTESTATION

I confirm the searches above were run against the subject identifiers held on file at the time of search, and that each returned match was reviewed individually against those identifiers.
